DPB-P

*Electro-welded
and stress relieved
robust frame*

①

*Easy utilization of cylinder
and manipulator and easy
management of all diagnostics
and alarms for all functions.*

⑦

⑤

*Up to 50% reduced labor thanks to
the bigger size dies.*

⑥

Dies made of special steel and heat-treated

② *Safety barriers and a stair which allows for maintenance on the machine*

③ *A special primer is applied for a long term corrosion resistance*

④ *Self-lubricating components for longer lifetime*

The DPB-P models have capacity of power between 150 to 1600 metric tons and internal distance capacity from 10 to 33 feet.
